*“Lymph is the most intimate and most
delicious best of the
best of the body - one always speaks of the
blood and its
mysteries and it is called a special juice,
but it is the lymph which is the juice of the
juices, the essence, the blood milk
a very delicious liquid”*

Claude Bernard
1813-1878

French Physician and
Physiologist

Coined the phrase

“milieu intérieur”

The fixity of the milieu supposes a perfection of the organism such that the external variations are at each instant compensated for and equilibrated.... All of the vital mechanisms, however varied they may be, have always one goal, to maintain the uniformity of the conditions of life in the internal environment.... The stability of the internal environment is the condition for the free and independent life.
